PROFESSIONAL SUMMARY

Aspiring Frontend Developer with a strong foundation in **React.js** and **TypeScript**, focused on building scalable, data-driven manufacturing solutions. Experienced in developing complex UI components, metadata-driven grids, and performance-optimized dashboards. Passionate about transforming Figma designs into pixel-perfect, type-safe applications that bridge the gap between human operators and industrial AI.

TECHNICAL SKILLS

- **Core:** React.js, TypeScript (Advanced), JavaScript (ES6+), HTML5, CSS3.
- **UI Frameworks:** Material UI (MUI), Material React Table, Tailwind CSS, Responsive Design.
- **State Management:** React Hooks, Context API, Redux Toolkit.
- **Performance & API:** REST API Integration, Axios, Windowing/Virtualization (React Window), Memoization.
- **Tools:** Git/GitHub, Figma (Design-to-Code), Postman, Vite, Webpack.
- **Visualizations:** Chart.js, Recharts (HighCharts familiarization).

PROJECTS

Smart-Manufacturing Dashboard | React, TypeScript, Material UI

- Developed a metadata-driven monitoring dashboard for real-time machine telemetry.
- Implemented **Material React Table** featuring conditional rendering for machine status and custom hover/click styling for deep-dive analytics.
- Utilized **React.memo** and **useMemo** to optimize rendering for datasets exceeding 5,000+ entries.
- Integrated **Chart.js** to visualize production efficiency and downtime trends.

Inventory Management System | React.ts, Context API, MUI

- Built a type-safe frontend to manage factory materials, ensuring strict interface definitions for nested JSON API responses.
- Engineered a reusable **Wrapper Component** library to standardize UI elements across the application.

- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to toggle UI visibility for different user personas.
-

EXPERIENCE (Academic / Freelance)

Frontend Web Developer | Academic Capstone Project

- Translated high-fidelity **Figma mockups** into responsive React components with 100% pixel accuracy.
 - Debugged complex TypeScript-related type mismatches in state-heavy components, reducing runtime errors.
 - Optimized API consumption by implementing custom hooks for data fetching and error handling.
-

EDUCATION

Bachelor of Technology in Computer Science *ABC Institute of Technology* | Graduating May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Web Technologies, Database Management Systems.
 - **Key Achievement:** 1st Place in College Hackathon for a "Supply Chain Optimization" web app.
-

KEY STRENGTHS

- **Type Safety:** Passionate about writing "strict" TypeScript to catch errors at compile-time.
- **Optimization:** Skilled in virtualization techniques to keep web apps snappy under heavy data loads.
- **Collaboration:** Experienced in working with backend teams to define clear API contracts and models.
